In the last report we sent the inputs that we need in 5 step but we still have this 4 inputs also we didn't understand how we could fill it

in the next slide we will mention again the inputs that we need in this step

As we mentioned in last report in this inputs we need the possibility of select **(pictures & videos)**

Create Ads

Name

status

Promoted page (it's better to give the possibility to select one of the pages that we have in this business manger)

Add media (videos or photos)

Primary text

headline

Description

Call to action

Note :

- this is the requirement input that we have to fill in the step of ads creation

This is the 3 Inputs that we need to add

As we mentioned in the last report we have a problem in the optimization goal

- is the optimization goal here means performance goal that we have in the ads manager in meta ?

If YES so this is how it would be

Performance goal

How you measure success for your ads.

Maximize number of conversions

Conversion goals

- ☒ Maximize number of conversions
We'll try to show your ads to the people most likely to take a specific action on your website.
- ☐ Maximize value of conversions
We'll try to show your ads to the people most likely to generate higher value for your business.

Other goals

- ☐ Maximize number of landing page views
We'll try to show your ads to the people most likely to view the website or Instant Experience linked in your ad.
- ☐ Maximize number of link clicks
We'll try to show your ads to the people most likely to click on them.
- ☐ Maximize daily unique reach
We'll try to show your ads to people up to once per day.
- ☐ Maximize number of impressions
We'll try to show your ads to people as many times as possible.
